chapter 1 the purpose of this chapter is to provide insights into how the proliferation of globalization has impacted labor markets both in advanced industrialized nations and well as developing nations insightful analysis will be drawn from oatley 2011 on division of labor jaumotte tytell 2007 on labor compensation hahn narjoko 2013 on the impact on south asian countries basu 2016 on wage as a share of gdp and wallace gauchat fullerton 2011 on the impact of globalization and labor markets on inequality chapter 2 building on the system of reason provided for by the greek philosopher and specifically aristotle st thomas aquinas built a comprehensive system and theory of natural law which has lasted through the ages the theory was further developed in the middle ages and in the enlightenment ages by many a prominent philosopher and economist and has been recognized in the modern age the natural law theory and system has been repeatedly applied to the spheres of economic thought and has produced many lasting contributions such as private property rights and individual rights in recent times with the collapses of the financial system and rapid globalization there has been a renewed interest in the application of natural law theory to economics to counter a certain anthropology and distortion of values created by a modern economic system of self preservation deriving its insights from the philosophies of thomas hobbes and niccolo machiavelli chapter 3 the credit crises experienced in the us in year 2008 is labeled as perhaps the most significant crises since the great depression the roots of the crises were found in the default of the sub prime mortgages and the failure occurred in both the us and the uk due to the integrated nature of international financial systems the spillover impacted many countries as the economies in asia and europe were purchasers of the sub prime mortgages that originated in both uk and us the impact of the credit crises in canada is of unique importance due to the close proximity to us and both the us and canada being of great strategic importance to each other as well as one of the largest trading partners even though the international financial credit crises adversely impacted many countries the evidence that has come across recent years point towards the conclusion that canada was able to weather the crises much better than many other countries

this lively introduction to heterodox economics provides a balanced critique of the standard introductory macroeconomic curriculum in clear and accessible prose it explains many of the key principles that underlie a variety of alternative theoretical perspectives including institutionalist economics radical economics post keynesian economics feminist

economics ecological economics marxist economics social economics and socioeconomics because the book's structure parallels the chapters and subject matter presented in a typical introductory macroeconomics textbook reintroducing macroeconomics provides readers with a running commentary on the standard approach while simultaneously introducing them to a broader range of ideas about the causes and appropriate policy responses to a wide range of common economic problems although designed primarily as a companion volume for students in introductory economics courses the book can also be used effectively for more targeted applications that highlight a particular economic issue or approach it will be of particular interest to students in related disciplines such as american studies anthropology black studies environmental studies gender studies history political science and sociology who may be required to take introductory economics classes and who are interested in gaining an alternative perspective by demonstrating the vitality and common ground underlying a broad spectrum of heterodox approaches reintroducing macroeconomics brings alternative perspectives into the classroom in an accessible way that empowers students to think about the economy in new and exciting ways the text includes end of chapter study questions as well as a detailed note to instructors

are the poor as one writer suggests only those without enough to eat or does poverty instead consist of the inability to buy a beer when everyone else has one these two volumes provide a comprehensive summary and annotated bibliography of the issues associated with the definition and measurement of poverty the discussion is organized around eleven topics in the areas of economics political science and sociology included are such diverse subjects as the historical evolution of poverty definitions how did karl marx and adam smith define poverty the index number problem and regional differences in poverty measurement the annotated bibliography including both articles and books primarily covers material written after 1950

in this book the author discusses four paradigms and shows how they view and explain any economics phenomenon differently and therefore together they provide a broader and deeper understanding of the economic phenomenon under consideration

charles sackrey analyzes the problem of urban poverty pointing out the severe limitations of all existing data he explains the different theories of the principal causes of urban poverty in particular the poverty among urban blacks considerable attention is devoted to

different methods of studying poverty and the important role each plays in determining the solutions finally offered for public consideration there have been two basic kinds of antipoverty solutions over the past four decades liberal reform and revolutionary change having been at different times strongly sympathetic to both camps professor sackrey has particular insights into the strengths and weaknesses of each in the final chapters of his book he contrasts the past performance of each camp and evaluates what they have to offer for the future amazon

this book discusses the relationship between pluralist economics and the case study method of teaching advocating the complimentary use of both to advance economics education using a multi paradigmatic philosophical frame of analysis the book discusses the philosophical methodological and practical aspects of the case study method while drawing comparisons with those of the more commonly used lecture method the book also discusses pluralist economics through the exposition of the philosophical foundations of the extant economics schools of thought which is the focal point of the attention and admiration of pluralist economics more specifically the book discusses the major extant schools of thought in economics neo classical economics new institutional economics behavioral economics austrian economics post keynesian economics institutional economics radical economics and marxist economics and emphasizes that these schools of thought in economics are equally scientific and informative that they look at economic phenomena from their certain paradigmatic viewpoint and that together they provide a more balanced understanding of the economic phenomenon under consideration emphasizing paradigmatic diversity as the cornerstone of both the case method and pluralist economics the book draws the two together and makes an effective case for their combined use a rigorous multi faceted analysis of the philosophy methodology and practice of economics education this book is important for academicians and students interested in heterodox economics philosophy and education

for the first time in over twenty five years the issue of poverty and our failure to deal with it is back at the top of the policy agenda and on the front page of the news in this magisterial overview social historian michael b katz examines the ideas and assumptions that have shaped public policy from the sixties war on poverty to the current war on welfare closely argued and lucidly written the undeserving poor transcends the barriers that have

channeled the american discussion of poverty and wealth into a narrow self defeating course and points the way to a new constructive approach to our major social problem
